

It would seem that allowing LPFM stations to take priority over currently existing FM stations would limit the freedoms of both the existing stations and those who choose to listen to them. K-LOVE is a station which provides great music and conversation to a large population even though funded completely by a small portion of it's listeners. With children and grandchildren across the country I am always gratified to know that we can ALL listen to the same thing at the same time, sharing what hopefully those of you reading this also share...worship of God and the comfort of his grace and guidance. There is truly very little non-aggressive, kind chatter on the radio waves. I will pray that you will be guided to assure myself and the hundreds of thousands like me who find solace and joy in this station. Thanks and God bless you.
